Mr. Jack Taylor, Director  
Washington Pollution Control Commission  
Administrative Building  
Olympia, Washington

Dear Mr. Taylor:

We are forwarding the copy of Professor Tymstra's opinion pertaining to the effluent disposal of the Western Gas Company in Bremerton. Also enclosed is a copy of my letter to Mr. Cookingham, who to date has not sent us any test samples for analysis.

A proposed period of thirty (30) days has been set, which seems a reasonable time for them to discontinue putting their wastes into Port Washington Narrows. In view of the fact that this company has consistently procrastinated in doing anything about their problem, I believe some stern action would be appropriate if they fail to comply.

Very truly yours,

  
C. J. D. Brown
